

Getting E-mail on your Kindle

You must first set up a g-mail account.

Directions were emailed to you.

Be sure your Kindle has the Whispernet or Wi-Fi turned on!

Choose the “Menu” Tab,

Scroll down to “Experimental”, choose it.

Under Web Browser, choose to “Launch Browser”

Curser down to “Google.com” and choose that.

Move your curser to the “Gmail” tab on the web page and choose that.

Fill in your user name a password using the key board and five way navigation tab. Remember, to get numbers and special symbols you must use the “Sym” key to get into the numbers and to get out of the numbers to continue using the letters!

When you are signing into your g-mail on Kindle, check the little box that says “stay signed in” and it will prevent you from having to go through the sign in each time!

Patience and practice are pre-requisites!!!!
