Putting Music on your Kindle

Music files are MP3 or WMA (Windows Media Audio) Compressed music files.

Connect your Kindle to the Computer using the USB connection plug.

Window Explorer will open and ask you what you want to do—

Choose View files. Listed folders will be MUSIC as one of the choices.

Double click on Music which will open the folder.

In another window on your computer, open the music that you have on your computer, which you have already copied there from CD's or that you may have downloaded.

Drag and drop the music files from the Computer Music to the Kindle Music Folder.

You can also copy and paste them from one to the other.
